MOHAMMED ODEJIMI

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front-end applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Remote.

February 2023 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured front-end web applications

Recent Projects:

Weather360 – A mobile-first fully responsive web application that renders weather data from cities around the world to clients' applications. It displays the current weather conditions, temperature, and a forecast for the upcoming days to the users.

Lingua Lookup – A fully responsive web application that attends to word requests from users of the web. It responds to the requests by displaying an array of data containing facts and other attributes of the requested word.

Other Projects: Figurer, Food-O-Matic, Nike Clone, Temperature Converter
